EDUCATION

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN — Expected May 2028

Bachelor of Science in Mechanical Engineering (expected 2028) — GPA: 3.77/4.00

SKILLS

Software & hard skills : MATLAB, Python (numpy,sympy), AutoCAD, Fusion360**,** 3D Printing, Soldering, Carpentry, CAD Prototyping**,** SolidWorks, engineering drawings, Excel, Powerpoint

Relevant coursework: Dynamics, Mechanics of Materials, Statics, differential equations

RELEVANT EXPERIENCE

Ghost Electric Motorcycle Team — Urbana-Champaign, IL

Suspension Team Member — September 2024 – Present

- Modeled a rear shock and front fork cartridge assemblies in SolidWorks to meet dimensional and performance constraints
- Modeled 10+ components to simulate different ortientations evaluating their impact on handling within Fusion360
- Presented a thorough design proposal for the next-generation swingarm, leveraging current data through suspension trials to predict a more effective iteration of the swingarm
- Evaluated the rear suspension geometry on steering response, focusing on the relationship between the rake angle and the trail

Personal Project for Ghost — Urbana-Champaign, IL

Project Co-Lead in Predictive Suspension Systems Research — September 2024 – May 2025

- Developed a dynamic quarter car suspension model to predict ride response under variable road conditions
- Created a standard operating procedure (SOP) for testing road conditions experimentally
- Executing bench test to verify the validity of the MATLAB simulation, to improve the design effectiveness of future suspension systems

MechSE MakerWorks Club — Urbana-Champaign, IL

Volunteer Member — September 2024 – May 2025

- Handled borrowing and purchasing of mechanical tools and supplies in the storeroom
- Planned and optimized 3D prints by changing print settings and reducing print time by 20%
- Trained and certified in safe woodshop and fabrication tool use

Disability Inclusion Project — September 2023 – January 2024

- Designed a skeeball game that catered to those with the loss of motor control or cognitive function
- Create a prototype on Fusion 360 and then replicate it using reusable material within the budget constraint of the project
- Created a slingshot mechanical system so that students with loss of motor control could play without having to use their fingers to roll the ball

EXTRACURRICULAR ACTIVITIES

Engineering Open House Volunteer — Urbana-Champaign, IL

Event Volunteer — April 2025

- Guided 50+ visitors in hands-on circuit board soldering, ensuring safety and proper technique
- Troubleshot circuit failures to resolve issues quickly and maintain event flow
- Demonstrated the proper technique and the desired shape to join metal to complete a circuit board to a diverse audience

Camp Coach (Volunteer) — Propsect highschool, IL

Leadership Role — May 2024-August 2024

- Coached kids' middle school and high school athletes, focusing on teamwork and skill development
- Mentored the youth to build confidence, discipline, and self-esteem
- Work closely with the head coach to distribute a coaching plan to 10+ athletes
